#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 09 January 2007.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

#### Disposition of Claims

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

3. Claims 1, 2, 4-9 rejected under 35 U.S.C. 103(a) as being unpatentable over JP 8-1353 and further in view of Sakota (US 5,895,584).

JP '353 disclose an electrode comprising a main body (6), and end cover (10), a guide sleeve (12) of insulation material received in the main body and having a part receiving hole communicating with the through hole in the end cover, wherein the guide sleeve has a throughgoing hole consisting of a major diameter section and a minor diameter section, a

container internally holding a magnet is slidably received in the major diameter section, a guide pin of iron is slidably received in the minor diameter section, the end of said container with the magnet exposed being joined to said guide pin, a compression coil spring acts on the other end of said container, said minor diameter section being used as said receiving hole, wherein a magnet (15) is inserted in the guide sleeve, wherein the detection current for parts detection flows through at least the magnet, end cover, and main body. The electric wire (23) is connected to a washer (21) receiving end of the compression coil (22).

JP '1353 fails to teach cooling water in the guide sleeve.

However, Sakota disclose a cooling water passage (11) between outer portion (14) and guide sleeve (13) with inlet and outlet for the purpose of cooling the welding heat.

Therefore, it would have been obvious to use cooling air or water, since both are known in the casting art as cooling means taught by Sakota, in JP '353, in order to cool the electrode from the welding heat.

### *Response to Arguments*

4. Applicant's arguments with respect to claims 1-2, 4-9 have been considered but are moot in view of the new ground(s) of rejection set forth above in paragraph 3.

### *Conclusion*

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1725

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
